

drive shafts

cross and counter flow towers

FRP, wooden, pultruded FRP, RCC towers

The Drive shaft is required to drive Axial Flow Fan. The driver unit is Induction Motor. Progetto make single span drive shafts are made up of high quality material. The drive shaft have flexible coupling on either end to absorb any misalignment during operation. coupling be made of hot deep galvanized steel or stainless steel, bushes of the flexible coupling shall be of neoprene material and bolt shall be of SS-304.

focus on manufacturing

- › In-house fabrication.
- › Suitable for outdoor operating in highly humid atmosphere.
- › Dynamically balanced as per G 6.3.
- › Dimensional Stability

Piping	:	SS-304 or IS 2062
Flanges	:	SS-304 or IS 2062
Fasteners	:	SS-304, SS-316
Bushes	:	Rubber

our products are known for their advanced design
and premium quality

your water, power, time and cost saving solutions
